PROFILE

Front-End Developer specializing in Angular and Magento, with hands-on experience delivering scalable eCommerce and enterprise-level web applications. Currently contributing to high-traffic production platforms, focusing on modular architecture, API integration, performance optimization, and user-centered UI development. With a background in engineering and digital business, I combine technical execution with analytical thinking and business awareness.

PROFESSIONAL EXPERIENCE

Front-End Developer

02/2025 – present

2B Egypt (full time)

- **Angular Development:** Designed, developed, and maintained enterprise Angular applications, including complex dashboards, responsive UIs, reusable components, REST API integrations, and scalable architecture.
- **Magento 2 Development:** Developed and maintained Magento 2 storefronts by building custom features, customizing themes, overriding modules, resolving bugs, and enhancing performance.

Freelance Front-End & Shopify Developer

2025 – Present

Self-Employed

- **Shopify Development:** Developed and customized Shopify stores using Liquid, building responsive themes, custom sections, UI enhancements, third-party integrations, and performance optimizations.
